SUMMARY OF INFORMATION

The inside of the small building is long when compared to width. Every 10-15 feet are metal beams running widthwise across the ceiling. There are metal things (A/S: hooks or clamps) hanging from the beams. The floor is shiny, polishy cement. The building is 40-80 feet wide and the ceiling is 20-30 feet high.

Teams of 6-8 men are working on the vehicles (mobile weapon systems). They are wearing old, worn out clothing. The turn around time for each team on a vehicle is 2 weeks. The vehicles are brought in 10-20 at a time on something flat A/S 'like' a flatbed railroad car or truck. The workers here are efficient and surprisingly serious and committed about their work. This is not a slack operation--things are done with precision and pride.
